PROFESSIONAL SUMMARY

Software Developer with hands-on experience developing, enhancing, and maintaining government enterprise systems using VB.NET, OpenRoad, and Actian Ingres Database. Proficient in application support, troubleshooting, system enhancements, stored procedures, and database operations across the full software development lifecycle. Actively expanding expertise in modern .NET development through personal projects utilizing C#, ASP.NET MVC/Core, REST APIs, and SQL Server. A detail-oriented problem-solver with a strong drive for continuous learning and a passion for building reliable, scalable software solutions.

WORK EXPERIENCE

IT Support Assistant (Programmer)

October 2022 – Present

DBPSC — Home Development Mutual Fund, Philippines

- Developed and maintained internal government systems using VB.NET, OpenRoad, and Actian Ingres Database to support housing loan process.
- Identified, analyzed, and resolved system bugs and technical findings raised during testing and post-deployment, minimizing downtime and service disruptions, maintaining accurate documentation of bug reports, resolutions, and system updates to support knowledge transfer and audit readiness.
- Coordinated with project managers, business analysts, QA teams, and end-users throughout the software lifecycle to gather requirements, translate them into functional system features, and prepare endorsement letters and technical documents for system requests.
- Monitored system performance and responded promptly to reported incidents, providing technical support to end-users and escalating complex concerns as needed to maintain service availability and reliability.
- Supported EPP Examination administration through technical assistance.

INTERNSHIP

System Analyst Intern

October 2021 – April 2022

JTV Security Agency

- Designed and developed a capstone project: "JTV Web-Based Payroll System with QR Code-Based Employee Attendance Monitoring" using Progressive Web App (PWA) technologies.

KEY PROJECTS — HOME DEVELOPMENT MUTUAL FUND

Revitalized Housing Loan Management System

- Developed and enhanced modules using OpenRoad and Actian Ingres Database to provide a single-view borrower profile, including loan details and other housing loan accounts of the borrower.

Outsourcing Tele-Collection System

- Developed and enhanced modules using VB.NET and Actian Ingres Database. Implemented account extraction and payment update functionalities for third-party collection processing.

Housing Loan Moratorium System

- Developed the moratorium processing module using VB.NET and Ingres Database to support temporary payment relief programs for housing loan accounts.

ADA Utility

- Provided application support and implemented enhancements for automated billing and payment processing systems built with C# Windows Forms and Ingres Database, improving operational efficiency and data accuracy.

CTS Cancellation System

- Developed and maintained a cancellation processing system using VB.NET and Actian Ingres Database. Automated generation of cancellation notices and accounting data loading processes. Participated in requirements analysis, testing, deployment, and post-production support.

PERSONAL PROJECTS

Smart Library System

- Modernized a VB.NET-based college project into a web application using ASP.NET Core and SQL Server.
- Developed REST APIs for book cataloging, borrowing, and return transactions.
- Integrated QR code functionality for efficient book tracking and management.
- Designed relational database tables and implemented CRUD operations.

Mock Exam Website

- Built a web-based mock examination platform with separate Admin and User modules.
- Developed features for exam management, question banks, automated scoring, and result tracking.
- Implemented performance analytics dashboards to visualize user progress and examination history.
- Utilized ASP.NET MVC, Entity Framework, SQL Server, HTML, CSS, Bootstrap, and JavaScript.

PokemonVault Information Website

- Built a web application that displays Pokemon information, including types, abilities, and statistics, using data from a public REST API.
- Consumed REST API endpoints using JavaScript Fetch API and dynamically rendered content on the webpage.
- Designed responsive and interactive user interfaces using HTML, CSS, and JavaScript.
- Implemented search and filtering features to enhance usability.

EDUCATION

Bachelor of Science in Information Technology

2022

Quezon City University

Information Communication Technology — Computer System Servicing Strand

2018

Cielito Zamora Senior High School

TRAININGS & SEMINARS

- Developing Web Applications with JavaScript, HTML5, and CSS — Oracle MyLearn (2025)
- SQL Experts — MongoDB (2025)
- Introduction to OpenRoad Application — Dsource Inc. (2023)
- Introduction to Actian X and Ingres SQL — Dsource Inc. (2023)

TECHNICAL SKILLS

Languages	VB.NET, C#
Frontend	HTML5, CSS3, Bootstrap, JavaScript
Databases	Actian Ingres Database, SQL Server, MySQL
Tools & IDEs	Visual Studio, OpenRoad, VS Code, Sublime Text
Design	Adobe Photoshop, Adobe Illustrator
