PROFESSIONAL SUMMARY

Software developer with hands-on experience building and maintaining enterprise-grade systems for government financial services. Specializes in VB.NET, C#, and Actian Ingres database, with a strong background in debugging, system optimization, and full-cycle application support. Proven ability to collaborate across teams from QA to end-user to translate requirements into reliable, production-ready features. Eager to bring backend development expertise and a problem-solving mindset to a growth-driven tech company.

PROFESSIONAL EXPERIENCE

IT Support Assistant (Programmer)

October 2022 – Present

DBPSC — Home Development Mutual Fund, Philippines

- Developed and maintained internal government systems to automate and improve operational processes, directly supporting high-impact financial services.
- Identified, analyzed, and resolved system bugs and technical findings raised during testing and post-deployment, minimizing downtime and service disruptions, maintaining accurate documentation of bug reports, resolutions, and system updates to support knowledge transfer and audit readiness.
- Coordinated with project managers, business analysts, QA teams, and end-users throughout the software lifecycle to gather requirements, translate them into functional system features, and prepare endorsement letters and technical documents for system requests.
- Monitored system performance and responded promptly to reported incidents, providing technical support to end-users and escalating complex concerns as needed to maintain service availability and reliability.
- Supported EPP Examination administration through technical assistance.

INTERNSHIP

System Analyst Intern

October 2021 – April 2022

JTV Security Agency

- Designed and developed a capstone project: "JTV Web-Based Payroll System with QR Code-Based Employee Attendance Monitoring" using Progressive Web App (PWA) technologies.

KEY PROJECTS — HOME DEVELOPMENT MUTUAL FUND

Housing Loan Management System

- Developed and enhanced modules using OpenRoad and Ingres Database for account verification, payment computation, and statement of account generation.

Outsourcing Tele-Collection System

- Built and supported a tele-collection system using VB.NET and Ingres Database, streamlining account extraction and payment updates for third-party collection teams.

Housing Loan Moratorium System

- Developed the moratorium processing module to support temporary payment relief programs for housing loan accounts.

ADA Utility

- Automated billing and payment processing workflows, improving data accuracy and reducing manual workload for finance operations teams.

CTS Cancellation System

- Developed and maintained the CTS Cancellation System, automating demand/cancellation notices and accounting data loading.

EDUCATION

Bachelor of Science in Information Technology

2022

Quezon City University

Information Communication Technology — Computer System Servicing Strand

2018

Cielito Zamora Senior High School

TRAININGS & SEMINARS

- Developing Web Applications with JavaScript, HTML5, and CSS — Oracle MyLearn (2025)
- SQL Experts — MongoDB (2025)
- Introduction to OpenRoad Application — Dsource Inc. (2023)
- Introduction to Actian X and Ingres SQL — Dsource Inc. (2023)

TECHNICAL SKILLS

Languages	VB.NET, C#
Frontend	HTML5, CSS3, Bootstrap, JavaScript
Databases	Actian Ingres Database, SQL Server, MySQL
Tools & IDEs	Visual Studio, OpenRoad, VS Code, Sublime Text
Design	Adobe Photoshop, Adobe Illustrator
